

JULY 25-28TH (SKYLINE TRAIL)

JULY 28-30TH (CAMBIE CREEK)

SKYLINE TRAIL AND CAMBIE CREEK TRIP

Skyline Trail: Snow Camp Mountain, Lone Goat Mountain, Red Mountain Plots

Plot Numbers: 00NCe82, 00NCe83, 00NCe84, 00NCe85, 00NCe86, 00NCe87

Dates	July 25th – July 28th
Location	Snow Camp Mountain, Lone Goat Mountain, Red Mountain
Parking	Strawberry Flats Parking lot, Skyline I trailhead
Campground	Mowich Backcountry Campground - Reservation: No reservations needed, just the \$5/ night backcountry permit
Estimated Total Hiking	- Could be ~50km over 4 days (It's a lot) - AllTrails link: https://www.alltrails.com/trail/canada/british-columbia/mowich-camp-from-gibson-pass-2
Water Sources	- Small stream/ water source runs ~500m E of camp Mowich. Could dry up but should be present end of July - Slightly larger snow pile and water source ~1km/ 10 min E of camp that should be present week of July 23rd
Access to sites	Access to plots 00NCe82, 00NCe83, 00NCe84, 00NCe85, 00NCe86, 00NCe87 from Skyline II trail at Gibson Pass
Predicted Weather	As of July 8 th : N/A

Special Precautions	- Water sources may be limited depending on the time of year. Reviews say there is a small trickle through the creeks into July, but typically gone by mid/late August. Should plan to bring lots of water in case. - Bugs (always a concern) will be very abundant at camp - Reviews note there were many bear and deer sightings - The ridge can be quite windy and cold, should plan to bring layers for the sites in these areas
Packing List	- Will send out document later on

Some photos from last weekend!

Tentative hourly plans for the weekend:

Friday July 25th (Travel and Hike in Day):

Total km of Hiking: ~16-19km

- 1) **9:00am – 1:00pm:** Drive from UBC to Strawberry Flats Parking, Manning Park
 - a) Pickup any last minute supplies, fill up water, fill up gas, ect. I will have picked up supplies the week before so there may be no need to stop!
- 2) **1:00pm – 6:00 pm:** Hike 12.57km (765m elevation gain) to Mowich camp
 - a) We will pass sites 00NCe87, 00NCe85, 00NCe84, 00NCe83, 00NCe86 on the way (and can scope out access) but will guaranteed not have time to survey
- 3) **6:00pm – 7:30pm:** Set up camp and dinner
- 4) **7:30 – Sunset:** Hike 1.5– 2.3 km E on skyline trail (280m elevation gain) to watch sunset on Lone Goat Mountain?? Would have to hike back in the dark but some is non-forested, moderate decline in elevation, and we'd have headlamps!
 - a) Has beautiful 360 views of Hozomeen Mountain, Lone Mountain, Frosty Mountain, Wright peak, Red Mountain, Snow camp mountain
- 5) **10:00:** Back at camp and sleeping!

Saturday July 26th Plan (3 plot day!):

Targeting sites: 00NCe86, 00NCe83, 00NCe84

Total km of Hiking: ~6km

1. **6:30 – 8:00:** Wake up and breakfast
2. **8:00 – 8:45:** Hike 0.36km E on Skyline Trail to plot 00NCe86 (right off of the trail)
3. **8:45 – 12:00:** Survey 00NCe86
4. **12:00 – 1:00:** Lunch
5. **1:00 – 1:30:** Walk another 1km E on Skyline Trail to the ridge between Red Mountain and Lone Goat Mountain, then 300m as the crow flies to the 00NCe84 (no official trail but in an open meadow ridge walk)
6. **1:30 – 4:30:** Resurvey 00NCe83
7. **4:30 – 7:30:** Walk ~100m to 00NCe83 and resurvey
8. **7:30 – Sunset:** We could hike 1.28km and 182m elevation gain to Red Mountain peak as we're already on the ridge. Make dinner at the peak, hike 2.5 km back to camp
9. **10:00-10:45:** Back at camp for dinner and sleep!

Sunday July 27th Plan (2 plot day, more hiking):

Targeting Sites: 00NCe85 and 00NCe82

Total km of Hiking: ~8km total

1. **6:30 – 8:00:** Wake up and breakfast
2. **8:00 – 9:00:** Hike 1.3km E on the Skyline trail towards Lone Goat Mountain, then ~600m off-trail NE around the base of Long Goat Mountain to 00NCe85
 - a. Refill water on the way out
3. **9:00 – 12:00:** Resurvey 00NCe85
4. **12:00 – 1:00:** Lunch
5. **1:00 – 2:00:** Hike ~2km along the ridge between Long Goat Mountain and Red Mountain to 00NCe82.
 - a. There is no official trail here, just moderate – easy ridge walking. It may become a steeper descent ~600m before the site
6. **2:00 – 5:00:** Resurvey 00NCe82
7. **5:00 – 7:00:** Hike another ~ 1 km (160m elevation gain) along the ridge to Red Mountain Summit (because why not if we have time!)
8. **7:00 – Whenever:** Dinner somewhere or hike ~3km back to camp
9. **10:00 pm:** Sunset or back to camp early

Monday July 28th Plan (1 plot day, hike home and return to Van):

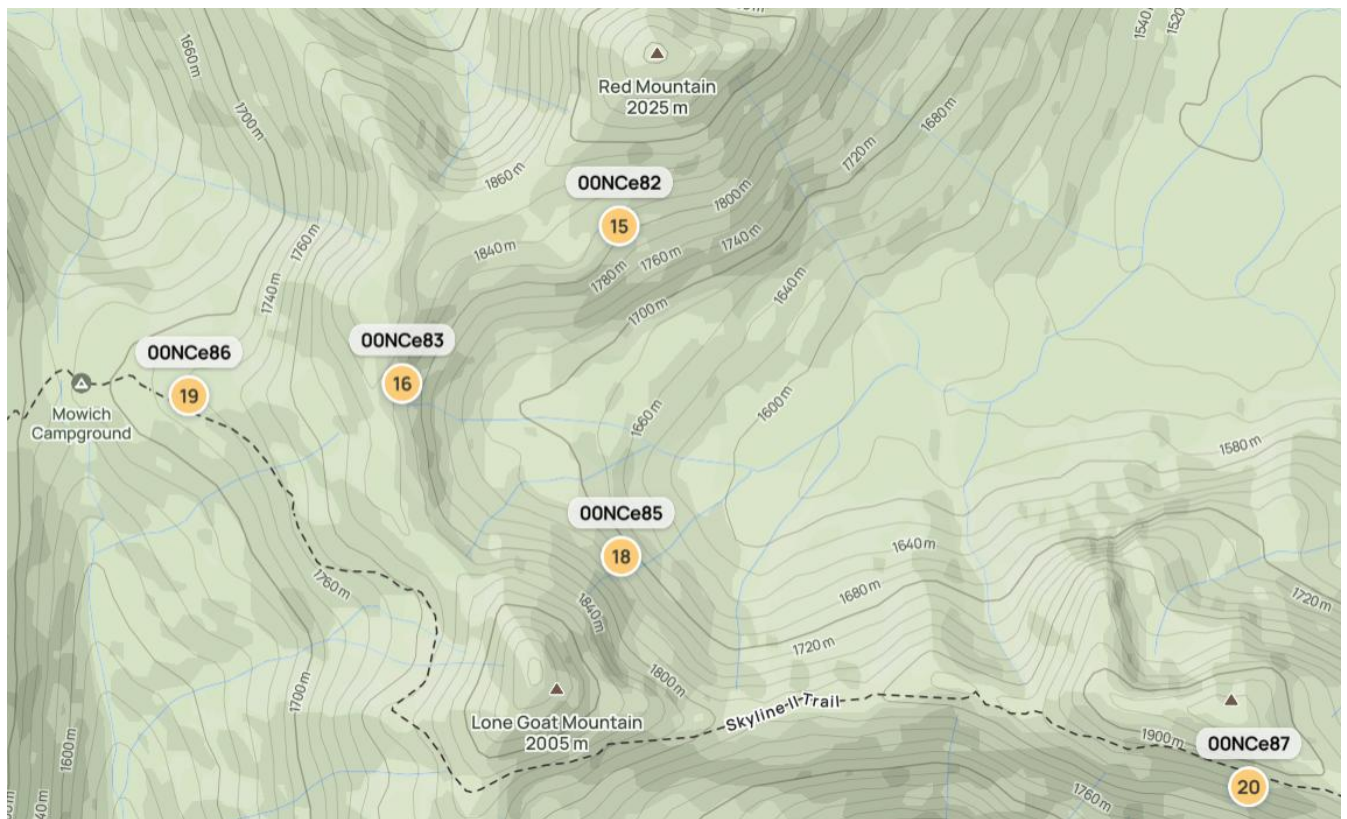

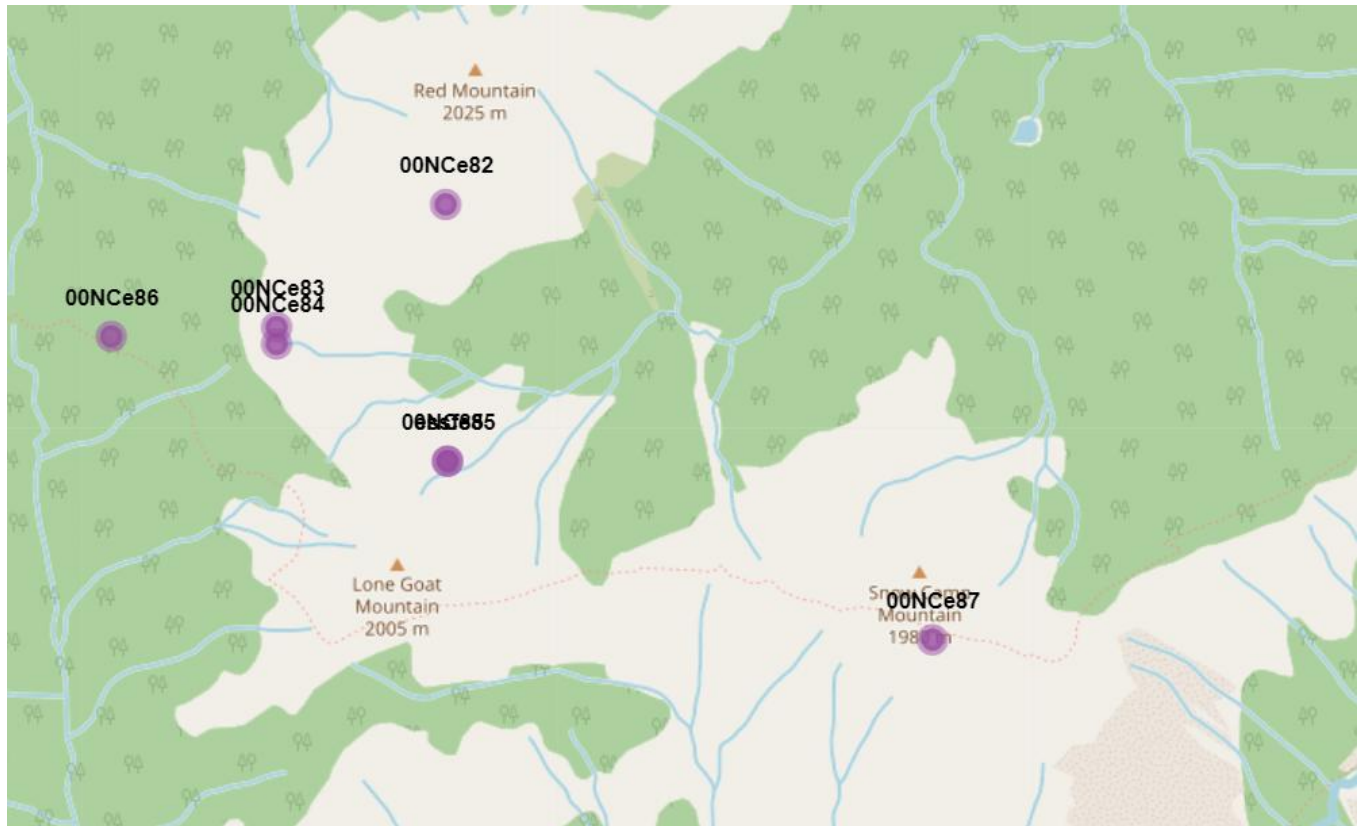

Targeting Sites: 00NCe87

Total km of Hiking: ~12-13km

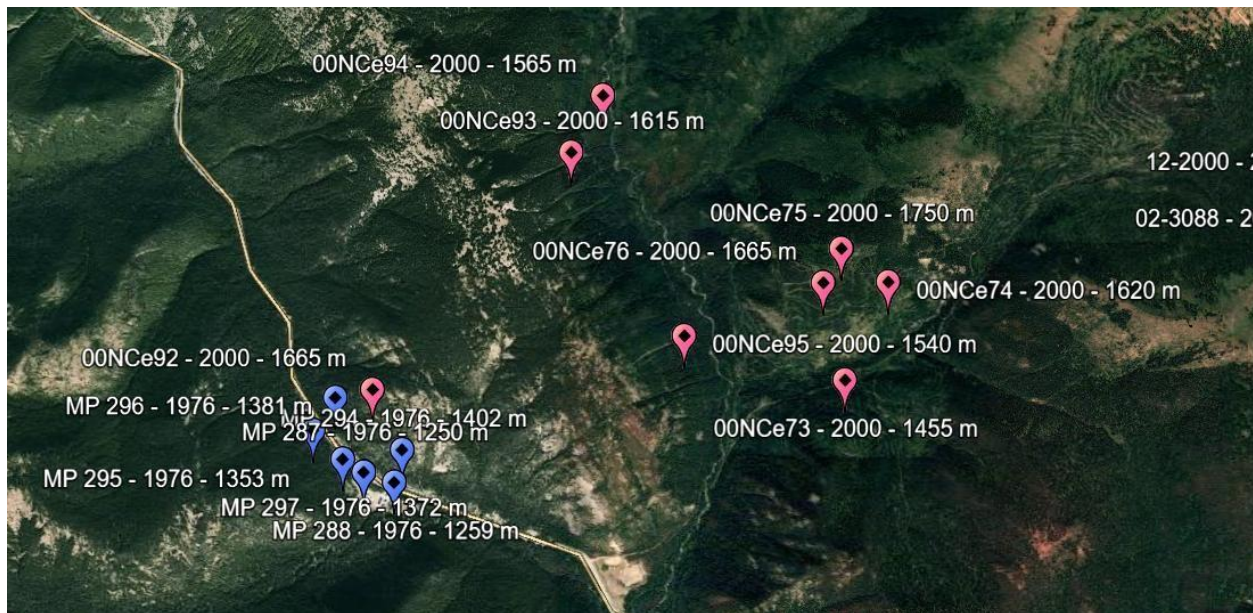

1. **6:30 – 9:00:** Wake up, breakfast, set up camp
2. **9:00 – 10:30:** Hike ~4km, 300m elevation gain, E on Skyline Trail to 00NCe87.
3. **10:30 – 1:30:** Resurvey 00NCe87 (right off of trail)
4. **1:30– 2:30:** Lunch
5. **2:30 – 5:30:** Hike 8.5km E on Skyline trail back to parking
6. **5:30 – 8:30:** Drive to Cambie Creek and set up camp

More Maps:

Cambie Creek: Burnt Knoll and Mount Kelly Plots

Plot Numbers: 00NCe73 (completed), 00NCe74, 00NCe75, 00NCe76, 00NCe93, 00NCe94, 00NCe95 (completed)

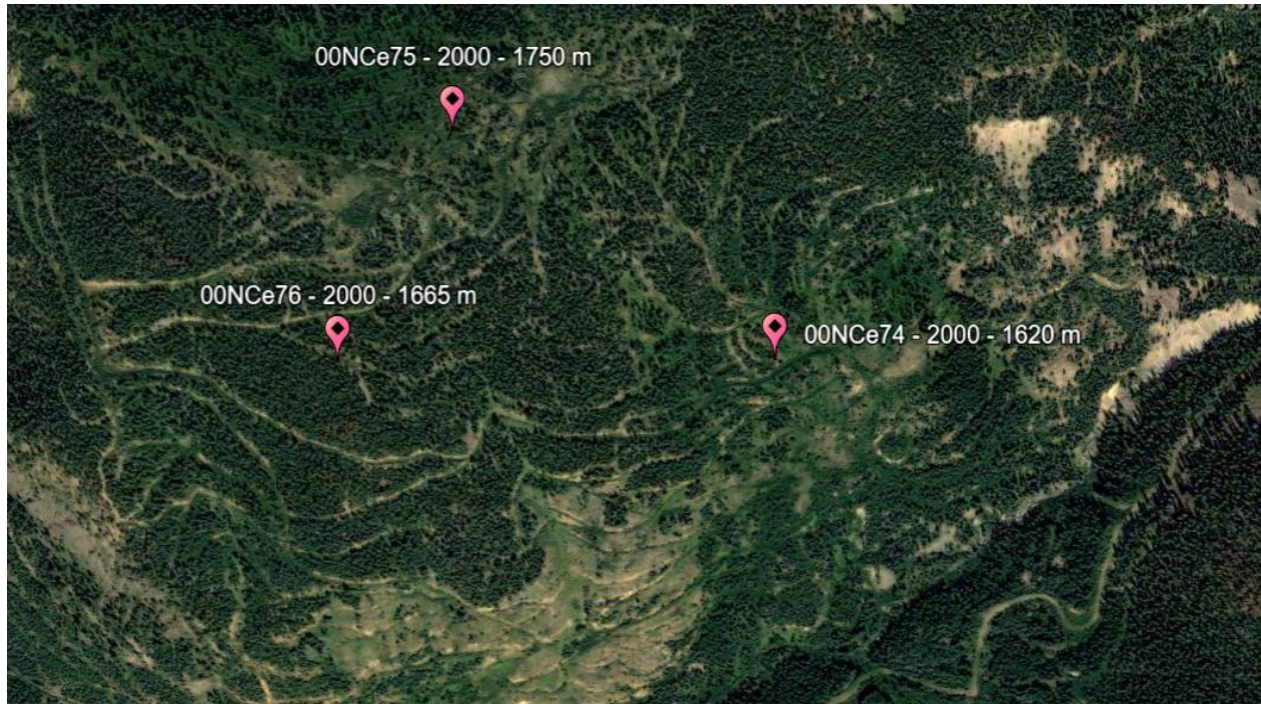

Dates	July 28-30, 2025
Location	Burnt Knoll and Mount Kelly area
Parking	Cambie Creek Trailhead Parking
Campground	Dispersed camping on Cambie Creek Loop trail - Trail is not used nor maintained in the summer, so Rachel and I scoped out a campsite along the trail next to the river and bridge (waypoint was made on the Garmin)
Water Sources	Tons of creeks in the area and camp is set up next to the Similkameen River
Access to sites	Access from trailhead via HWY 3, Cambie Creek Loop Trail, Fat Dog Trail, Unnamed trails - Access to Plots 00NCe73, 00NCe74, 00NCe75, 00NCe76 : o Hiking access: Cambie Creek Loop Trail then Fat Dog Trail - Access to Plots 00NCe93, 00NCe94, 00NCe95 : o Hiking access: Cambie Creek Loop Trail then unnamed trail
Predicted Weather	As of July 4 th : N/A
Special Precautions	- When Rachel and I were in the area, there was lots of bear scat on the trail, some fresher, some old. 2 cans of bear spray should be taken in case.
Packing List	- Will send out document later on

Tentative hourly plans for the Cambie Creek Area:

Monday July 28th Evening Plan:

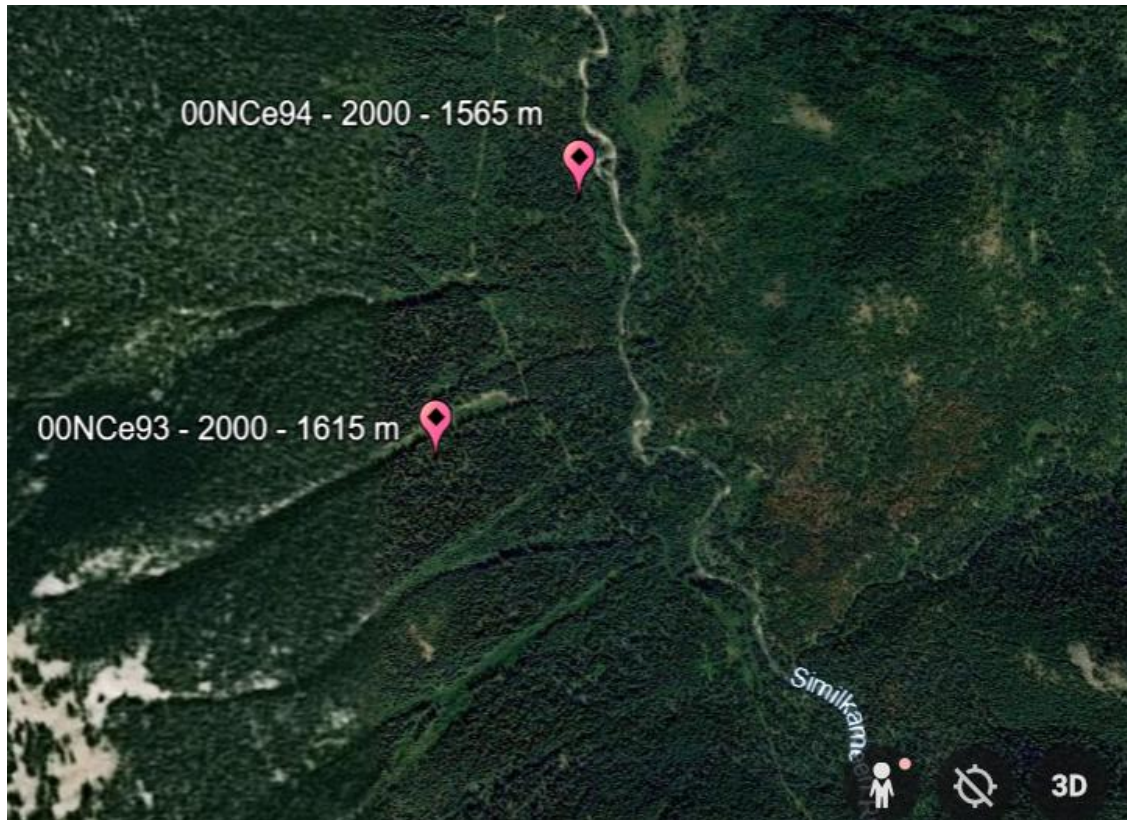

1. **5:30 – 9:30 pm:** Hike in from parking (1.45km, 59m elevation) and set up camp at waypoint by the bridge

Tuesday July 29th Plan (busy day!):

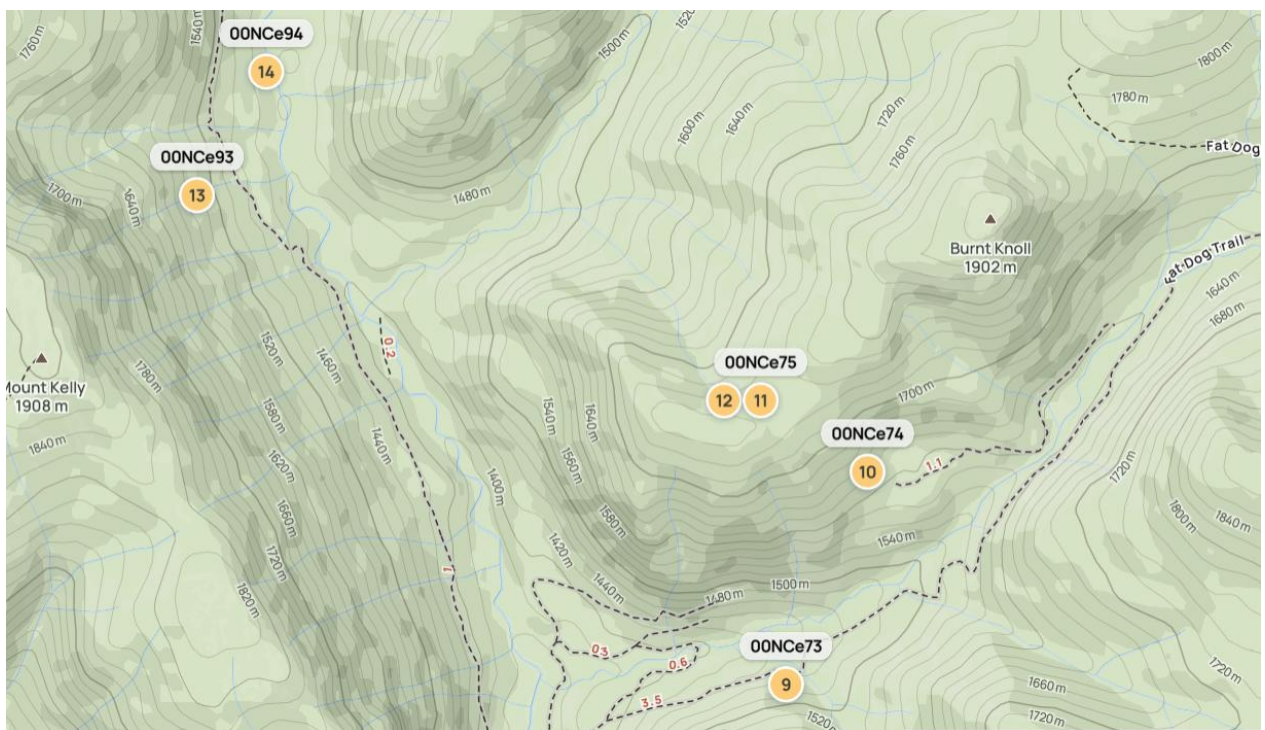

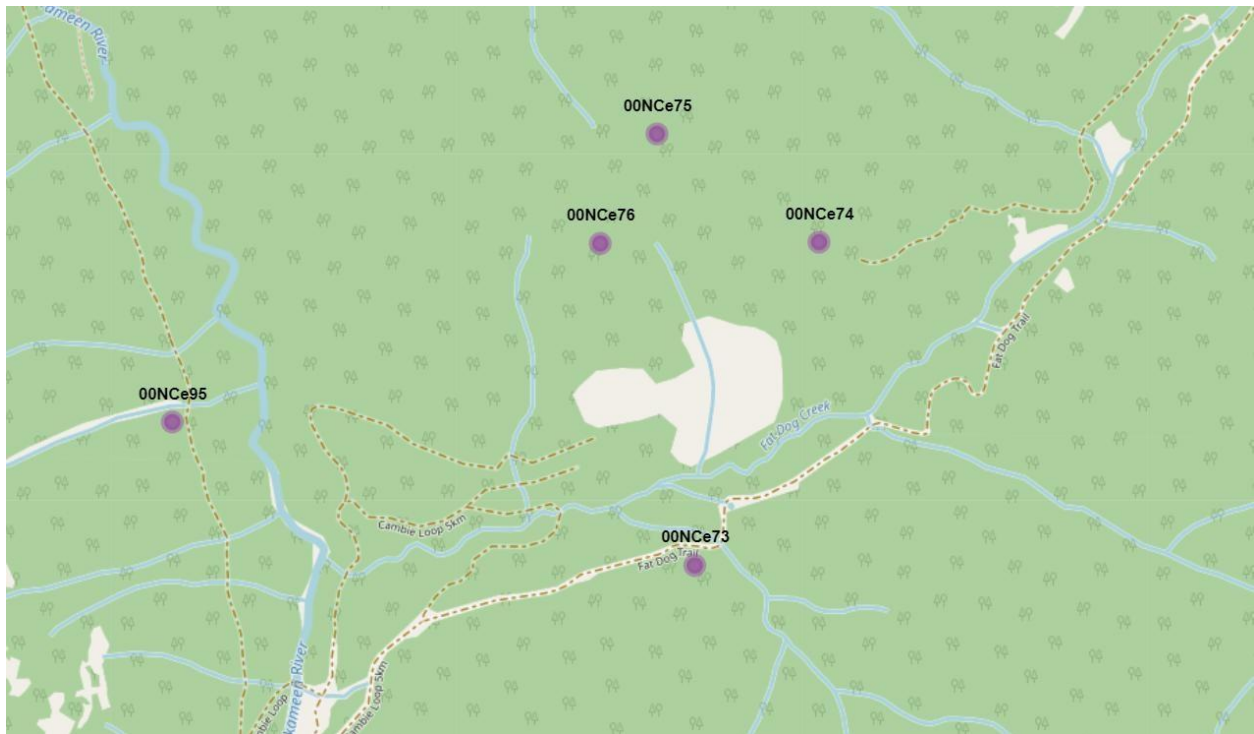

1. **6:30 – 7:30:** Wake up and breakfast
2. **7:30 – 9:30:** Hike 3.36km on Fat Dog Trail, 293 elevation gain (unless access to cross the creek is available at 1.95km – 2.95km)
3. **9:30 – 10:30:** Cross creek to unnamed trail, hike 1.13 km on unnamed trail, then bushwhack 200m to plot 00NCe74
4. **10:30 – 1:30:** Resurvey plot 00NCe74
5. **1:30 – 2:00:** Lunch
6. **2:00 – 2:45:** Bushwhack or take old logging roads to 00NCe75 (500m as the crow flies)
7. **3:00 – 6:00:** Resurvey 00NCe75
8. **(If time)** Bushwhack down the mountain or take old logging roads to 00NCe76 (280m as the crow flies)
9. **(If time)** Resurvey 00NCe76
10. **6:00 – 8:00:** Bushwhack 500m as the crow flies back to trail. Hike 1.13km E, cross the creek, then 3.36km back on Fat Dog Trail to camp
11. **8:00:** Back at camp for dinner and sleep!

Wednesday July 30th Plan:

1. **6:30 – 7:30:** Wake up and breakfast
2. **7:30 – 9:00:** Hike 2.75 km, 200m elevation gain, along unnamed trail, then bushwhack 180m and 50m elevation gain to 00NCe93. Elevation listed is wrong for the lat/long coordinates given.
3. **9:00 – 12:00:** Resurvey 00NCe93
4. **12:00 – 12:30:** Lunch
5. **12:30 – 1:00:** Hike 600m on trail, then bushwhack 175m to 00NCe94
6. **1:00 – 4:00:** Resurvey 00NCe94
7. **4:00 – 6:00:** Hike back to camp
8. **6:00:** Dinner and hang by creek or take down camp and head home

More Maps:

Plot Number	00NCe82
Project ID	NCBG_ESSFplots
Date Surveyed	2000-10-04
Access Via	Trail: None. ~3km ridge walk from camp
Location	Longitude: -120.964625748643 Latitude: 49.0446240525405 Elevation: 1810 Location Notes: Manning Park, SE of Red Mountain
Site Information:	Stand age: NA Slope gradient: 31 Aspect: 134 Meso Slope Position: MD Surface shape: CV Zone and Subzone: ESSF unp Site notes: --EcoPoly: 14323 (label is hard to read), --FC: no typing available, --%canclosure=0, --natural non-disturbed condition is likely nice open mwp forest, perhaps not so much a tree island composition, --lots of fire-hardened snags and CWD; sizable high elevation forest prior to disturbance (average tree height ~ 16-20m; dbh 40-70 cm)
Plot Representation	ESSFmwp forested mid-seral post-fire
Species Recorded in original survey	Species list complete: FALSE HERAMAX, ABIELAS, POACEAE_, PECTBRE, VALESIT, LUPIARC, VACCMEM, VACCDEL, VACCSCO, RHODALB, ARNILAT, VERAIR, CAREX, PICEENE, FRAGVIR, RIBEACE
Veg Notes	=--@very sparse moss cover
Soil Notes	=--@soil pretty dark coloured

Plot Number	00NCe83 **Possible lat/long error here, this area does not have a 68 slope
Project ID	NCBG_ESSFplots
Date Surveyed	2000-10-04
Access Via	Trail: Take the skyline 1km from camp, then 0.5km of ridge walking (depending on where we decide to climb up to the ridge)
Location	Longitude: -120.9723988 Latitude: 49.0409285 Elevation: 1800 Location Notes: Manning Park, SE of Red Mountain
	Stand age: NA Slope gradient: 68 Aspect: 68 Meso Slope Position: UP Surface shape: ST Zone and Subzone: ESSF unp Site notes: --EcoPoly: 14329, --FC: no typing available, --%canclosure= 0, --typed as ATp on ecomapping (would likely come out as mwp in KFR mapping), --bear scat in plot
Plot Representation	ESSFmwp non-forested avalanche track herb dominated
Species Recorded in original survey	Species list complete: FALSE AQUIFOR, VERAVER, VALESIT, HERAMAX, LUPIARC, ASTER, POACEAE_, ANGEARG
Veg Notes	NA
Soil Notes	=--@thin moder

Plot Number	00NCe84 ***Elevation very very wrong. Not possible for this area.
Project ID	NCBG_ESSFplots
Date Surveyed	2000-10-04
Access Via	Trail: Take the skyline 1km from camp, then 0.5km of ridge walking (depending on where we decide to climb up to the ridge)
Location	Longitude: -120.9724193 Latitude: 49.04042506 Elevation: 685 Location Notes: Manning Park, basin between Red Mountain and Lone Goat Mountain at base of AvTr
	Stand age: NA Slope gradient: 7 Aspect: 85 Meso Slope Position: LV Surface shape: ST Zone and Subzone: ESSF unp Site notes: --EcoPoly: 14394, --FC: no typing available, --%canclosure= 0 ,--site is a mish mash of different microsites--wet herbs, salix, and understory beneath the salix, and dry open sites
Plot Representation	ESSFmwp non-forested avalanche track low shrub dominated (run-out zone)
Species Recorded in original survey	Species list complete: FALSE ARNICA, ABIELAS, ANGEARG, SENECIO, LEPTPYR, VACCDEL, TROLALB, VERAVER, PECTBRE, SYMPFOL, POTENTIL, CAREX, VALESIT, SALIX
Veg Notes	--extensive moss coverage; no specific id's. --B2 salix pretty tall @ ~ 1.75m
Soil Notes	NA

Plot Number	00NCe85
Project ID	NCBG_ESSFplots
Date Surveyed	2000-10-04
Access Via	Trail: Hike 1.3km E on the Skyline trail towards Lone Goat Mountain, then ~600m off-trail NE around the base of Long Goat Mountain to 00NCe85
Location	Longitude: -120.9645592 Latitude: 49.03686803 Elevation: 1705 Location Notes: Manning Park, Lone Goat Mountain
